3.LEBOUR COVERS INSTARLITION,MOUNTING, CONFIGURATION,AND LOGISTICS	1		<del>N=</del> 107,000	<del>N=</del> 107,000
-----------------------------------------------------------------------------	---	--	-----------------------	-----------------------

### INSTALLATION TERMS

Installation will commence after confirmation of payment, all Equipment will be Installed, Configured and Tested

### METHOD STATEMENT

#### *Procedural Implementation Approach*

The following gives our proposed general implementation plan for the execution of the project from the day of award and disbursement of funds.

- Equipment Procurement
- Location Survey & familiarization with the Location for safety reasons. This involves visiting the Location for installation inspection and to get familiar with safety requirements of the Location, this exercise also involves getting the premise managers approval on pathways and spaces planned to use.
- Systems Installation & Configuration.
- Testing Configurations & Fine tuning.
- Testing equipment's (Clients)
- Internet access testing Via LAN/Wireless
- Invitation to test by equipment by Organization Representative /professional/company consultant
- Final Testing with Owner/Clients

### CONCLUSION AND RECOMMENDATION

#### NETWORK LAN / WIRELESS TECHNICAL SUPPORT

The success of every IT project is its proper utilization and maintenance, it is therefore part of our business goals and objectives not to let any project done by our company go down, we will therefore provide IT Staff training and monthly maintenance and technical support at any given time when need arises.

We recommend that the server should have a 24/7 uninterrupted power supply for the safety of equipment and configuration.

The table above provides a comprehensive breakdown of the product prices, subscription costs, and the overall grand total associated with the project. Conversely,

the table below elucidates the labor expenses involved in the project, encompassing the training costs for certain staff members.

1. Within **Starlink's service** offerings, various subscription plans are available. For the context of this scenario, we have opted for one of the lower-tier subscription bundles. This particular bundle accommodates a maximum of 150 users at a time, while notably retaining an unlimited usage feature.

**Yours faithfully**  
**Eng. Muhammad Abdulkadir**
